The ICAB delegation brought to the notice of the Director, Finance that the PDB has been serving more than 90% people within the capital. But there is neither proper electric distribution management system, nor a well-designed system loss control

device by which PDB can reduce the system loss. As much the state-run water supply agency has been facing serious challenge in maintaining an adequate level of supply to the people in Dhaka City.

In this connection the delegation informed Director, Finance that the Institute of Chartered Accountants of Bangladesh (ICAB) can play a very useful role if opportunities are offered. ICAB could provide professional services to Dhaka PDB in designing a control device in collaboration with the PDB Authority to reduce the system loss. The device may include among others, consumer ledger audit, periodical audit of the PDB production and distribution accounts, comparison of the budgeted and actual production and distribution-pump house wise, reason for both favorable and unfavorable variances in production and distribution, assessment of local circumstances responsible for system loss and recommendation of remedial measures.

IAASB Releases ISA Implementation Resources to promote awareness and understanding of the clarified International Standards on Auditing (ISAs), the International Auditing and Assurance Standards Board (IAASB) has released a second series of ISA modules—short video presentations, accompanying slides, and supporting notes that explain the key principles of, and major changes in, some of the new and more significantly revised ISAs. These modules cover ISAs that address materiality in planning and performing an audit of financial statements, the evaluation of identified misstatements, written representations, using the work of an auditor's expert, and auditor reporting. The IAASB has also released Auditor Considerations Regarding

Significant Unusual or Highly Complex Transactions, a question-and-answer (Q&A) publication. The Q&A highlights considerations in the ISAs that are relevant to auditing such transactions, often an area that gives rise to risks of material misstatement of the financial statements.

### IAASB reports on clarity ISAs implementation monitoring
